

## **Birdie App**

All Christies Carers use the Birdie App to coordinate and report on client care in real time.

The Birdie App has proved to be a great success and provides an efficient way to communicate important information between care staff and office staff. The Birdie app is also the best place to access all the right information about the care that needs to be provided.

The app will be used to record things digitally and you will need to learn to navigate the app whilst caring for your client. The Birdie app is easy to use and you will be shown how to download and operate the app during your induction training.

You will need an up-to-date phone to download the app on. Please note it does not work well on iPads, tablets etc.

A basic knowledge of IT will help.

Our team is here to support you with any questions so please ask.
